Bottom 10 Countries by Internet Usage

Top GDP Countries vs Internet Usage

Top Education Countries vs Internet Usage

Key Findings

Internet adoption is increasing globally

Average internet usage grew from 34.1% in 2010 to 72.0% in 2023.

Digital divide remains significant

Top countries have >94% internet usage, while bottom countries are below 10%.

GDP matters

Higher GDP per capita is generally associated with higher internet adoption.

Education matters

Countries with higher education rates tend to have higher internet usage.

Other factors at play

Some countries achieve high internet adoption despite not having the highest GDP, suggesting infrastructure, policy, and investment also play key role.
